

SOLIDKOTE 505

THINNERS FOR EPOXY SYSTEMS

DESCRIPTION

Solidkote 505 is a blend of selected solvents for use as diluent thinners for epoxy coatings and/or cleaning of equipment using in coating process.

DIRECTIONS

Use up to 15% dilution of relevant product with Solidkote 505, is a guideline for spray techniques. Alternatively the volume of diluent required is determined by viscosity of material required.

PRECAUTION

Do not use Solidkote 505 with any polyurethane based coatings as the product contains alcohols which will cause adverse reactions with isocyanates based materials and will result in an undesired result such as bubbling and foaming on the surface.

TECHNICAL DETAILS

Appearance: Clear colourless liquid
Odour: Typical Solvent
S.G: 0.8-0.85

SAFETY

Solidkote 505 is a highly flammable product and the necessary precautions must be taken. Wear rubber gloves, suitable clothing, solvent respirators and eye protection during use.
